NUMBER FIFTY-TWO

Town Hall Meeting Monday

Mrs. W. W. W.

On Monday afternoon at 2 o'clock, Mayor L. C. Proby of Grenada called a meeting of committee men and committee women at his office to discuss with state and area supervisors of both the federal government and the United Service Organization, the subject of securing a building to house soldier recreation in Grenada, also to discuss the merits of the agency best suited to render religious, social and recreational services to our fighting men. At this meeting were the following people: Mr. L. C. Proby, Mayor of Grenada; Mr. Hartke, Federal Secretary Administration official; Mr. J. L. Zwingle, of Atlanta, Southern Regional Representative for the United Service Organization for six states and Mrs. J. K. Avent, chairman for USO in three counties, and member of the State Executive Board.

The Works Project Administration was represented by Mr. Lawhorn, of Jackson, Mrs. Fletcher, of Greenwood, and Mrs. H. A. Alexander, of Grenada, who has been tendered the position of county chairman of municipal soldier recreation for Grenada.

The following citizens, which formed the executive committee to meet twice last week were present, and they are: Mrs. L. D. Boone, Mrs. J. M. Talbert, Mr. H. A. Alexander, Mr. D. Y. Dillard. Not present were Rev. Mr. Liles who was out of town, and Mr. Fred Spain.

The Winona citizens were represented by their Mayor, Mr. Ringold, Editor Seay and Mr. Trewalla.

Mr. Proby graciously welcomed the Winona group, and in order that they finish their business and return home, gave way that they could discuss Winona's needs first with the area men, thereby giving them time to return to Winona, to discuss the situation with local committee men and be ready for the distinguished visitors at 5:30, the hour they expected to reach Winona, when enroute to Jackson.

GRENADA MEETING

—Mayor Proby greeted the group and explained why the meeting was called.

The imperative need for a recreational center to be started in Grenada soon necessitated the meeting in order that the F. S. A. representative, the WPA representative and the USO representatives lay before the Mayor and the committees their plans and purposes, and to acquaint himself (the mayor) with the facts and contributing information as to which recreation agency is best suited for Grenada.

Mr. Proby called on Mr. Lawhorn, WPA representative for a statement as to what the city would be called on to do in order to have WPA supervision for soldier recreation. Mr. Lawhorn made this statement: He was authorized by WPA headquarters in Jackson, that in view of the unfavorable attitude of the people as expressed through the press (GCW only) showing their antagonism, to say what they (WPA) were willing to withdraw.

Mr. Proby stated that as that was not official publicity, to please continue the discussion which he did.

Mrs. J. K. Avent, USO representative at this meeting, spoke briefly at this time, and assured the group that should WPA supervision of soldier recreation be approved by the board she would continue her active aid. Her interest always is in the soldiers and those to come to Grenada, because of the army camp. She reminded them that Grenada was once two towns, and over a hundred years ago, was joined in bonds of brotherly love. She asked that in this situation we have unity for in unity there is strength—and divided we may fall.

In the following discussion the fact that the FSA will not sign a contract with the WPA was brought out but the FSA will sign a contract with the FSA.

The FSA representative stated that the FSA will sign a contract with the city and the city must assume the responsibility of WPA. If the WPA operates soldier recreation in the city, the city of Grenada will have to pay for the water, lights, heat, repairs on building, as well as pay the director's salary.

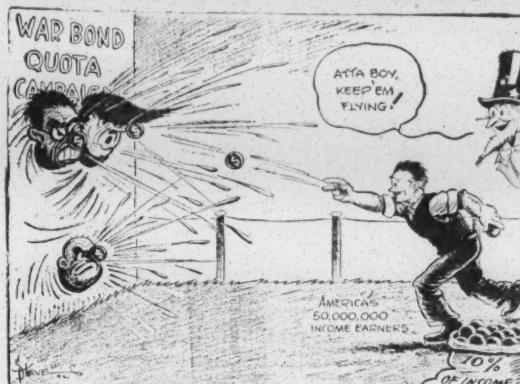

The FSA representative, Mr. Hartke, having stated that the FSA would sign directly with USO the mayor and committee were assured by Mr. Zwingle that the United Service Organization would pay all salaries, pay all expenses including water, lights and heat. Repairs to be made by the organization in charge of building. The money for these expenses to come from the National USO treasurer.

The negro work will be carried out in the same manner as for the white soldiers. They have several lots listed as being convenient to their churches and district.

P. S.—

The WPA representative said that the objection he wished to make to the article written by Mrs. W. W. W. for last week's issue on the soldier recreation, was the relating of the incident on the bus where the soldier from Greenville said that Greenville was the deadest place he ever saw and that

Every Dollar Makes 'Em Holler!

Jim Eastland, Candidate For Sen. Wall Doxey To Speak Here Next Thursday Nite

Jim Eastland, candidate for the U. S. Senate in the August primaries, will continue his campaign for the seat he held last summer as interim senator after the death of Senator Pat Harrison, when he speaks in Grenada at

10:30 o'clock Monday morning.

Credited by the Public Press with having brought an additional \$50,000,000 to the South last fall when he blocked the placing of a ceiling on oilseed oil, the former senator will have a message of particular interest to the farmers and businessmen of Grenada county.

In his appearance thus far over the state, Mr. Eastland has insisted that plans be made now to set up unemployment compensation in the form of continued pay for service men for at least six months after discharge.

He also advocates pay for school teachers commensurate with the responsibility they have, a per capita federal pension fund for all states.

Death brought an end to the long suffering of Alfred P. Guntharp early last Saturday morning, July 18, 1942, at the residence in the Garner home on First Street in Grenada.

He was a native of Coffeeville, Mississippi having been born there on March 23, 1863. His entire business life, except after his retirement in 1933 was devoted to the E. C. Ratliff.

For many years he worked in the office in Grenada, but at the time of his retirement on pension he was Freight Agent at McComb. He and Miss Cora Sherman, a member of one of Grenada's oldest families, were married in 1914.

Mr. and Mrs. Guntharp remained sweethearts until the end. Their devotion one to the other was a standing refutation of the saying that love and devotion dwindle as time passes.

Funeral services were simple and dignified. Rev. C. A. Pharr had a brief service at the home, after which the Masons, of whose fraternity the deceased was a devoted member, took charge at the Odd Fellows cemetery.

Pallbearers were Messrs. Rogers, Burt, Ben Adams, Jim Cuff, Herman Heath, Jack Moture, and W. L. Kennedy, the latter of Coffeeville.

Only his widow, Mrs. Cora Sherman Guntharp, remains. To her, the Grenada County Weekly extends its sincere sympathy.

Alfred P. Guntharp died last Saturday morning.

Finishing Our Fifth Year

Those who notice our publications will see that this issue is marked Volume 5 Number 22, and those innumerable ascendants that we have finished our fifth year of publication of this newspaper.

The old July 1st is now a tradition of the many favors extended us during the first five years of newspaper. Both of us have had the same kind words that have been spoken regarding our independent publishing in "real community news" for the Grenada and Grenade County, and both of us are happy to take the words of criticism, which critics have been few, that have come. We appreciate the sentiments advanced by us even before we had a press or building to put in, as we appreciated the hundreds who have been kind since. However, there are particularly sound arguments for the editorials of ours. We implore the growing volume of job printing to keep us to the standard with which it is set.

It is said that you can't buy influence in new friends, and this can be said of a newspaper. A man or a newspaper that has no friends or enemies, but who tries to see his job as such, is certain to go down. It is often said that I might be a good editor, but not a good man, and that goes down in the opinion of many Weekly.

Malice and I do not care what we say. The County Weekly has been popular because it has a lot of things here in Grenada, as well as we have so conducted this newspaper that it is a real newspaper should be up to date for every man in the community. We feel that we have done our best to earn the respect of not only the people of this particular community but also the respect of nearly all citizens of the state.

That we have made mistakes and many of them, we would be the first to admit. But were mistakes of judgment and not of malice.

On the eve of completing our sixth year of publication, we rededicate the Grenade County Weekly to the slogan that appeared in Volume 1, Number 1, "Grenade County News A Specialty, Other News Used Only in Emergencies."

Everything As Usual

Except for the fact that there is a camp being erected near Grenada, except for the difficulty of getting new tires and except for the fact that sugar is rationed—except for the very strict cane and sugar beet production in the United States, is being carted as heavy loads—there would suggest there was never to be produced.

In some of the facts that appear later which be replaced, we see the beginning of war. Our people are still too much divided into separate parties, and having no real American government.

Nobody would believe that the continued freedom of the American people is safe in this war. They speak of the freedom in the "empire" of Europe, the "freedom" of the Japanese emperors to enslave and organize all the road and star of thousands being led and forced to the Dan and the Volga etc., hearing and reading again that they will turn the faces of their prisoners to the sun, or fire in the radiator, some probably end.

Are the events to come in New Orleans, or are they to reach Dutch Hill before our people awaken to the dangers that face them and about Washington to be with whilst McParland's a smouldering mass of ruins. Molle and Bonaparte, shambles, are our people realize that our country is in a life and death struggle? Shall we wait until the neighbor's son (or what is left of the once handsome boy) is brought back in a flag draped box, or shall we wait until our own son comes back in a flag draped box?

In our national government going to continue to talk of millions of rounds of ammunition, "on order," thousands of merchant ships contracted for hundreds of bombers and tanks, burning gasoline in this country, or is it soon to report a considerable number of these instrumentalities of warfare actually in conflict with the enemy?

Are Britain and the United States and their allies to wait until both China and Russia are knocked out of the war before they provide some diversion?

A Hell Of A Note

Things have gone quite pretty fast in a supposed-to-be civilized community. When the sovereign Grenade county has to have a bunch of land bills printed and placed in the court house rollers, warning people that a ten dollar reward will be given to any person who reports wetting of the floor, or "despoliation" the corners, stealing toilet paper or "defacing" locker in the toilets. I imagine wetting the corners, always a favorite spot, is also subject to disciplinary action.

Yes, it's a hell of a note. It is a bad bird who will spoil his own nest.

P. S.—I understand that, after the regulars were tucked up in the toilets, some man—not only stole the toilet paper, but also took all of the 6 x 9 circulars.

A Slight Error, Perhaps

I may have made a slight mistake last week in saying that the frame structures at Camp McCain were the sorriest the government ever paid for, as I heard indirectly that some barracks were built in Key West without any floors.

However it is a cinch that the soldiers who are on Mother Earth cannot fall thru the floor and skin an ankle or break a leg, and that's some consolation. The barracks there at least have solid floors, and that's something that cannot be said of the floors in the barracks that I saw at Camp McCain.

A thousand pardons!!

Digging Up Dead Cats

The Jackson Daily News' editor devotes a considerable part of his attention to Jim Eastland and the fact that Mr. Eastland has not left his family and joined the armed forces, but Sunday I believe Fred's foot slipped for, in his campaign about Eastland's non-military record, he stated "Jim Eastland's friends are always talking about Jim being the same age as Pat Harrison was when the latter was elected to the U. S. Senate," words to that effect.

Yes, Pat Harrison was about the same age in 1918 as Jim Eastland is now, and well do I remember hearing Pat Harrison speak at the artillery range to the Mississippi soldiers in his campaign against Vardaman, and well do I remember marking an "X" by Pat's name on my absentee voter's ticket.

Pat Harrison "of blessed memory" (as Fred always typified our deceased senior senator) WAS of military age, and Pat Harrison DID NOT separate himself from his family and join the armed forces.

It seems to me that, if Fred condemns Jim Eastland for awaiting his turn to be called to service, he should have condemned Pat Harrison "of blessed memory" for awaiting his (Pat's) turn to be called to service.

Responsive Chord

From the number of favorable comments that I have heard from men from all over the county, I must have struck a responsive chord last week when I suggested that the county could well afford to abolish the buying agent's office.

Too many people cannot see why the general public should pay a man to cut pines, vaccinate cattle, prune trees and lay off terraces for individual farmers.

Too many folks are beginning to suspect something that I have known all the time; that we are in the hands of the A. & M. College trust.

Do not tell me what you think. Tell your supervisor, for the supervisors are the men who disburse county funds.

What About The Police Judge?

We are wondering why the City Council does not appoint a Police Judge.

A month or more ago, the City Council published its intention to change the City Charter to permit the appointment of such an officer, provided there was no protest from the citizens of the City of Grenada. There was no protest from the citizens, and this gave the tact of the people to the change in their fundamental law—the City Charter.

We are wondering what is the cause of the delay? If it is a good thing—and the people, by their failure to protest, have said so—then why, pray, are not the wishes of the sovereign people of Grenada put into effect?

I am particularly interested in this matter for if the proposition has a daddy, I am the daddy.

We understand that down in his Congressional District our District Attorney, Hon. T. G. Abernethy, is making a vigorous campaign for Congress and has an excellent chance of being elected. We do not know his opponent, the present Congressman and know little about him, but we do know that if Congressman Ford sees and speaks to as many people as Abernethy he will have to get up early, stay up late, and travel fast.—The Southern Sentinel.

Me and the U. S. A.

It looks like Jim Eastland and Abernethy.

The wimmen are still fighting.

Aint they sweet.

Why Our Army Is Stalled

By HERBERT B. ALLEN

General officers of exceptional ability are exceedingly rare in any army.

War planes, tanks, anti-aircraft guns, motorized artillery, automatic rifles, machine guns, munitions, and the equipment of a modern army can readily be manufactured in this country.

American manhood can be conscripted, physically conditioned, put through basic and advanced training, and given every attribute of a soldier except the principal one—experience under fire!

But no army in the world possesses a formula for developing general officers who can be depended upon in war time. In this respect, democratic nations are under even greater handicaps than aggressor nations.

Aggressor nations, intent on making war, give their general most intensive training, while the peacetime maneuvers of democratic nations are often pitiful jokes. One example of such pathetic maneuvers was held by our army in 1940.

Meanwhile, the bloody battlefields of the Spanish civil war provided a training ground for those Nazi officers who were destined to command the German steam roller of the current war. While British, French, and American generals engaged in their "war GAMTS," the Nazis in Spain were practicing in the grim realities of actual warfare.

War is the business of young men, and blitz warfare demands great mental and physical vigor, courage and resilience in the high command, as well as in the rank and file of the army.

While in warfare of rapid movement and swiftly changing technique, generalship is more than ever a young men's business, this war finds our army generally under the command of men in their sixties—white-haired men just a few years short of the army retirement age. This is a tragic anachronism!

Our old generals have spent their entire careers learning and practicing a technique of warfare that is now entirely obsolete. They are no longer young enough to learn the traditional mode of warfare in which they were educated, and new scheme of blitz warfare moves entirely too fast for their comprehension. The result is utter confusion and the inaction of the entire army!

This inaction of the high command results in the spectacle of American garrisons all over the globe, with no important American military forces in actual combat zones.

Younger leadership, with bolder strategy and great

courage, could have landed a REAL A. E. F. not in peaceful Ireland, but in warring Norway. American forces, months ago, could have given vital aid to the Russians, and would now be a genuine menace to the Nazis.

As it is, the British are now engaged in building CANTONMENTS and a great BASE HOSPITAL in Northern Ireland to house what the army humorously calls an "A. E. F." At the present time it is no more an A. E. F. than the British pilots training on American flying fields could be called a British Expeditionary Force.

As the titanic struggle in Russia approaches a critical stage, the old generals in our command appear paralyzed into inaction, strangled in a maze of army red tape, lost in traditional army procedure, handicapped by inexperience and weighted down with indecision. They appear to lack both capacity and resolution.

The U. S. Army was not always commanded by feeble desk officers. It was once a hot bed of red-blooded combat officers. Let us drop back eighty years to that generation of West Pointers that did the hardest fighting and made the most brilliant reputations, and examine the record.

A representative group of Confederate and Union general officers, selected from memory, with their age as of April, 1861, were: Robert E. Lee, 54; A. S. Johnston, 50; Joseph Hooker, 46; G. G. Meade, 45; Braxton

Bragg, 44; W. T. Sherman, 41; James Longstreet, 40; Earl Van Dorn, 39; D. H. Hill, 39; John Pope, 39; U. S. Grant, 39; Stonewall Jackson, 37; A. B. Hill, 35; J. B. McClellan, 34; Phil Sheridan, 30; J. B. Hood, 29; J. E. B. Stuart, 28.

It is indeed significant that the average age of those eighteen generals was 39 years. The great Lee was 54, just two years younger than Pershing was on his arrival in France. The incomparable cavalry leaders, Stuart and Sheridan, were 28 and 30 respectively.

Eight years ago, when war was fought on foot and horseback, we had young combat generals commanding our armies. Today, when war planes, parachute troops, fast tanks, armored cars, motorcycle units and motorized artillery are vital forces in our army, these lightning elements are commanded by old men—men who have never seen these instruments of blitz warfare in actual service!

The results speak eloquently for themselves. At this critical stage of world history, the army remains inactive while the old men try to make up their vacillating minds what to do next. How long can this condition continue?

It is very likely to continue until there is a powerful public demand that our army command be placed in the hands of younger, war-minded combat officers, willing, capable and eager to get our army into action. The world desperately needs action by the U. S. Army!

Seen, Heard and Told
By The Editor

If those negro soldiers begin jiving in their barracks, it is my belief that the roof will tumble without delay.

Chas' Williams and family have moved back to Grenada from Jackson.

Mrs. Mary Meek has gone to Waynesville, North Carolina to spend the period of the year. Ain't it grand to be rich!

Talbert Turner has just returned from Washington where he visited his sons, one of whom was recently inducted into the army, and the other one doing well in government service.

We welcome Mrs. J. W. Haynes as a new subscriber to the GCW.

Better keep your little (and big) electric fans properly oiled so that they will last for the duration. I tried to get a small spot fan Monday and could not find one. Also, it would be wise to take extra good care of you* electric motors, large and small.

I do not know about other communities, but Grenada knows there is a war going on, even if it is a war between the WPA and the USO. The gigantic struggle in Russia and Egypt and the Pacific sink into places of comparative insignificance compared to our local war.

These hot days certainly are hard to "make."

Oh, me.

what is America Fighting For?

Equal Opportunity for ALL!

(One of the Essentials of a Democracy)

Deep in the breast of every American boy flares the light of hope and ambition. Equal opportunity to "make his mark" is one of the many American principles our country will ever fight to protect.

American fathers have shown their sons that—in our country—individual initiative has brought success time and again. Throughout our country's history, the thousands of great Americans, who, by their own efforts, raised themselves high in America's state, professional and business life repeatedly illustrate this truth. In America—as nowhere else—every boy, rich or poor, has that cherished privilege of making his life worth while in the field of endeavor he chooses!

Equal opportunity for all . . . the American ideal of free enterprise . . . the American way of life! Those things have made America great. Those principles will see America through to Victory!

FIRST SOLDIERS ARRIVE

On Monday our office was honored by two distinguished gentlemen, soldiers both in the person of Capt. F. S. Arant and 1st Lt. C. F. Garland. They are with the Medical Corps and assigned to Camp McCullum, Grenada.

Jack Erickson, one of the young men employed with the Engineer of Chas. T. Main Co., left this week (Wednesday) for Camp Shelby. While in Grenada he lived in the home of his aunt, Mrs. W. W. Whitaker.

Both Frederick Thielman and "Bubber" Echoes are Technical Sergeants, not Staff Sergeants, as reported in this paper last week. They are at Camp Bowie, Texas.

Miss Louise Sanders, 1942 graduate at L. S. U., arrived home on Thursday inst. Louise is the daughter of Mr. Jack Sanderson.

Mrs. W. J. Robinson and children, William, Lucy and Larry, visited the Dr. Whitaker family in Sardis several days last week.

Lt. James R. Hooker returned to his duties at Fort Knox on Friday last. Mrs. Hooker attended the graduation on July 4 when her husband, Sgt. Hooker received his commission and following this they came home. Lt. Hooker visited here for ten days.

The GW office force was delighted to have Miss Bessie Burns, of Alexandria, La., to call at the office Monday morning. She is the guest of Mrs. N. S. Woods at Chapel Hill. Miss Burns' parents were natives of Chapel Hill neighborhood and Miss Burns and her mother keep informed about friends through the GW.

Mrs. Joe B. Williams and little daughter visited Mr. and Mrs. Robert McLarty at Blaine in Sunflower county last week. They returned home Friday evening.

Mrs. E. R. Proudfoot is spending the summer in Sardis with her sister, Miss Adelaide Duvay.

Out-of-town relatives to attend Mr. Guntharp's funeral on Sunday afternoon, Mrs. A. M. Sheltor and daughter, Miss Mary Katherine Shelton, New Orleans; Miss Maggie West and Mrs. Bessie Ellison, Columbus, Miss.; Miss Bessie Ellison, Memphis, and Mr. and Mrs. T. B. Hughes, Greenwood.

GORE SPRINGS H. D. CLUB MEETS

On Thursday, July 9th the H. D. Club held its regular meeting with 12 members present. Meeting was called to order by singing several songs, after which the roll was called. Madam President took charge. Mrs. G. E. Chamberlain and Mrs. Eugene McGahey gave two interesting readings, and Mrs. T. J. Morton read several riddles. Mrs. E. L. James read a piece which was published in our GW, "I Want To Go Back."

Recreational leaders then took charge and entertained the crowd for a few minutes. One new member was added to the roll. Mrs. Robert Taylor. Meeting adjourned.

Letters From Men In The Armed Service

From Sgt. John E. Williams to Mrs. Gaston Williams.

Victorville, Calif., July 16, 1942

Dearest Mother and all:

I didn't write last night for I was pretty tired when we got up. I haven't heard from you since Sunday. I thought that I would have several letters when I got back from Ohio, but I didn't have any. Did you get the letter that I wrote while I was in Ohio? I hope so.

I sure did have a nice trip. It was worth lots to me. One and really saw everything from the air. The farms and all were so pretty. We didn't stop but three times while going over. Our first stop was in Albuquerque, New Mexico; we were there about two hours. We ate dinner there. Oklahoma City was our second stop. We stopped there at Will Rogers Field to get gas. Then we stopped in St. Louis and stayed overnight. We stayed at the Hotel St. Louis. We went on to Dayton, Ohio. St. Louis was sure pretty from the air. We had a good time.

We had to take another road from St. Louis to Dayton. It was really hilly, but it looked good. We had not seen any since East Texas.

We spent the night over in St. Louis and left the next day about 8 a.m. for Dayton, Ohio. This is the home of the Air Corps that is where we are enroute on enroute.

I carried two 32nd Regiments Captain in my plane.

On the way back we stopped at Springfield, Ill., and had dinner. Then we stopped at Tulsa, Okla., at 10:20 a.m. Regained the road after we had dinner. We took the highway down to the town. It is really pretty trade route. Then we went to Kankakee Field, Illinois. They as and spent the night there.

At Kankakee Field they gave us a ride and let us go to town. It's a little town.

We left Kankakee Field about 10:30 a.m. to go back the next morning. We stopped in Midway, Texas, and ate dinner. From there we went to Dallas, Texas, where Granville used to live. It is really pretty there. Well, I wouldn't know the place now for we have just so far from the original building. I saw all kinds of houses and cars in Dallas. When we got back we regularly began to talk. I could see men grinning at all the big guns and start counting them off as I told them to do that when a similar planes over for practice. We got gas there.

Our last stop was in Arkansas. We got gas there too, and from there we came back to Victorville.

I took eleven hours to go from Victoriaville, Calif., to Dayton.

But we took our time coming back.

I sure got close to home one time.

We got close to Arkansas. It could not offer us Arkansas.

We got close to the mountains again. It looks great, but the clouds and see the clouds. We got close to the clouds and rain. We tried to get above the clouds but they were high in the mountains that we could not see.

We were flying 15,000 feet high, looking over the mountains. It was real cold.

We didn't have any trouble until we landed here. We had a fight this when we landed. I suppose that we stand tall in it when we left Arizona. We landed OK, but it took the tree off. We landed about 115 miles from home.

I have been putting a new engine in inspection on my plane today, so will take some time being thorough.

I am going to be on V.P. tomorrow. I will go on at dinner.

I really had a swell time. You should

see a map and see where I went. I don't know how much gas we used but I will figure it up and send it in the next letter. We used only one gallon of gas on the entire flight. Coming to Ohio, I really have a good ship now, but guess the sand will soon get it again.

Who's At The Hospital

BY AGT. THEY SWEET

In Grenada Hospital, Mrs. M. G. S. and infant daughter, Mrs. Nancy Ann Pittman; Mrs. M. Charles Hamby, Memphis; Mrs. J. H. Ellington; Miss Dorris Peeler, Covington; Mrs. Ira Peeler and Miss Nancy McSwain, Sebrell; Miss Virginia Griffin, Grenada; Mrs. A. Johnson Holcombe; Mrs. Victoria Townes and infant daughter, Grenada; Mrs. L. Townes and infant daughter, Grenada; Mr. Charles Corder, Hattiesburg; Mr. H. D. Martin, Enid; Mrs. J. B. Bowen and infant son, Tie Landis; Mr. George Kraft, Chicago; Rose Evelyn Crimble Coffeyville; Alex Gossard Holcomb; Mr. F. L. Allison, Dallas; Mr. George Shoum, Carrollton; Mrs. F. D. Uncle Sam Counts On Farm Pledges

Branscome Wins State Honors

Presentation of awards and election of new officers featured the closing session of the ninth annual convention of the Future Farmers of America at Mississippi State College last week.

J. D. Branscome, of Birford Chapter, Duck Hill, was winner of the State Master Farm award given by the Mississippi Farm Association and the F. F. A. member with the highest record based in farm supervision, chapter activities, savings and investments, community and cooperating activities, and scholarship. He was awarded \$90 in cash.

The Birford Chapter was winner of the chapter award given to the chapter with the best record in all F. F. A. activities during the past year.

Uncle Sam To Help Ole Miss Students

The University of Mississippi is now prepared to make available to students in certain scientific fields generous loans from its share of the \$5,000,000 loan fund provided for by an Act of Congress of June 30, it was announced from the Chancellor's office recently. Loans of tuition and fees plus \$25 a month for twelve months a year are available to students who are registered in the accelerated program and whose technical or professional education can be completed within two years, in one of the following fields: engineering, physics, chemistry, medicine, and pharmacy. The loan will be secured by a note payable to the Treasurer of the United States and will bear an interest rate of 2½ percent per annum.

The indebtedness of the student shall be cancelled, according to the Congressional Act, if before completing his course the student is ordered into military service during the present war, if he suffers total or permanent disability, or if he dies. The conditions of the loan are that the student must attain and continue to maintain standard of scholarship, that he must be in need of assistance, and that he must agree in writing (1) to participate, until otherwise directed by the Chairman of the War Manpower Commission, in accelerated programs of study in any of the fields named above, and (2) to engage for the duration of the present war in such employment or service as may be assigned him thru the War Manpower Commission.

Applications are now being received at the University.

The trials of justice conducted by Mather, McVay, and Miller Proby have been bringing out justice in town. These measures here of late, as there has been a lot of devilmaking going on.

U. S. Navy Needs Colored Men

C. G. Crenshaw, Chief Machinist Mate, in Charge of Recruiting in Northwest Mississippi has issued a call for men of the colored race for enlistment in the United States Navy and Naval Reserve.

The period of enlistment in the Naval Reserve is for the duration of the war and the Regular Navy is six years. The age for enlistment in the Naval Reserve is 17 to 50. The rate of pay is from \$50 to \$126 per month with an additional allowance for men with dependents.

All colored applicants that pass the required physical examination for enlistment in the U. S. Navy or Naval Reserve in the Grenada, Miss. Substation will be issued transportation to New Orleans, La., at Government expense with hotel accommodations and meals free. If for any reason an applicant fails the physical examination in New Orleans, La., he will be sent back home by the Navy with all bills paid.

When an applicant passes the final physical examination in New Orleans he will receive preliminary training at Great Lakes and later undergo specialized training there or at Hampton (Va.) Institute.

Here is a great opportunity for young colored men to learn a trade as electricians, carpenters, ship fitters, machinists, metalsmiths, firemen, storekeepers, Radomen, signalmen, cooks, Yeomen, etc.

The Navy today is a vast organization of skilled workers and all men are given an equal opportunity to learn a trade. Why not enlist in the Navy and serve your Country and benefit yourself by learning a trade that will be your source of income later in civilian life?

All men interested in enlisting in the Navy should report to U. S. Navy Recruiting Station, Postoffice Building, Grenada, Miss., which is open from 8 a.m. to 8 p.m. week days and from 8 a.m. to 1 p.m. Sundays.

Cpl. V. C. Fite Promoted To Sergeant

The promotion of Corporal Verlin C. Fite, son of Mr. and Mrs. Guy Fite, of Grenada, to the grade of Sergeant, has been announced in orders issued in the 29th Infantry.

Sergeant Fite is assigned to Anti-Tank Company, 29th Infantry. Military authorities stated that his promotion was based on his attention to duty and soldierly qualities.

The 29th Infantry, commanded by Colonel T. A. Pedley, Jr. is better known in U. S. Army as the Demonstration Regiment for the student officers in attendance at "The Infantry School."

In addition to demonstrating weapons and tactical problems the 29th tests everything from a new field range to the latest model rifle, for the Infantry Board, from whence comes its motto, "We Lead The Way."

Sergeant Fite is at Fort Benning, Ga.

Huge Air Base For Grenada Area Probable

According to information deemed to be reliable the government has acquired the 400 acres near Heserway for a proposed air base and will likely acquire about 3,500 acres in the area of the acquired acreage. The holdings to sufficient size will not only provide landing fields, but also for practice of machine gunning targets on the ground and dropping dummy bombs.

Early this year in the hope of interesting a civilian air school to locate in the Grenada area, the city and county jointly issued bonds and bought about 400 acres, principally from Will Hayward. This, we understand, is the acreage already acquired.

When or if built this field will provide quarters and training terrain for the air units attached to the Triangular Division to be stationed and trained at Camp McCain south of Grenada, and now under construction.

It looks sorter like this is a rich man's fight and a poor man's war. I will not at this time expand on that thought.

SPURRIER STUDIO

Now open for business. All kinds of photographic work. Located in the old building formerly occupied by CAMPBELL STUDIO.

First Street Grenada, Miss.

By The Editor

V-

We suggest that the people of West Ward approach Mr. Henry Ray, Sr., with a view of asking him to run for alderman to take the place of Mr. Harry Burkley, resigned. Mr. Ray has devoted a lifetime to the conservative care of other people's money, and it seems to me he would make a good man on the board, especially since he is always interested in civic affairs, is financially independent and, therefore, can speak his mind and vote his convictions without fear of retaliation from some disgruntled citizen.

LOST: the city Police Judge. The people agreed to the necessary charter change weeks ago, yet there is no police judge.

Although we ran almost completely out of copies of last week's issue, we finally dug up a copy for a major out of the Inspector General's Department in Washington, who was much interested in Camp McCain—the Termites' Paradise."

Any man could defend 2x4 knotty rafters four feet on center in a 20 or 22 foot wide building, he could have cleared Iserloot or Benedict Arnold.

If anyone wants to continue the controversy over the sorry barracks at camp McCain, I am ready with plenty more ammunition, but I am willing to let the matter rest where it is. I have had my say, and am willing to let it go at that, unless stirred up.

Aint they sweet.

Poor aldermen!! They are going to be discussed whatever they do in the USO-WPA controversy.

The engineers and office employees at the camp are getting up a petition requesting that the water in the swimming pool be chlorinated twice a week. This seems to be a reasonable request.

Look over YOUR assessments at the court house this month, and, if dissatisfied, make your protest at the August meeting; or forever hold your peace.

We are printing 14,000 more of the "Dear Ross Collins" letters for distribution over the entire state. The GCW is known from the Tennessee line to the Gulf; from the river to Alabama.

If anyone wants to announce for alderman, West Ward, the GCW will announce them free.

After purging the election books, I guess there are not over 1500 persons in Grenada county eligible to vote on August 25th. Many are registered but have not paid poll taxes; many have paid poll taxes but have not registered. To vote, you must be registered, and MUST carry two poll tax receipts with you to the election booth.

Many insist that the old lady let Miss Sallie de Beaus have just one little call every week.

I do not reckon I will get any printing at the camp now, sure enough. However, I have not lost much, as I was never able to get any anyway. They cannot penalize me much for telling the truth.

Those who get printing by bids called me once in May; once in July. We may get another call in September.

The hay crop on a lot of vacant lots in Grenada is about ready to cut.

The jack barn is certainly a forlorn looking place, no doors, or windows, uncleaned, and will soon be taken over by the bats and owls unless Joe McAfee can be persuaded to house his flock in it.

Any old Georgia Tech man of the vintage of 1907-1912 will be grieved to learn that Dean Hill, a football star of that period of Tech's athletic history, died in Atlanta about June 15. His home was in Groversville, New York.

Our municipal goldfish, having lived in an "atmosphere" of amber and snuff spittle so long, have become allergic to clean water, and it would probably be disastrous to clean out the city fish pool.

This is Volume 5, Number 52, which means that we have finished our fifth year of publication. To the charter members, this means that your "jues are juc" again.

One virtue of our article, "Camp McCain—the Termites' Paradise"—was that it was true.

It looks like Jim Eastland is going to carry Grenada county in spite of the fact that I am for him.

Sheet Futhay has been added to the police force in Grenada. He has been serving as Game Warden.

MISSISSIPPI POWER & LIGHT CO.

MISCELLANEOUS HANDY HINTS

SLIDE FASTENERS SHOULD never be forced—they should be opened and closed by the tab. While laundering or ironing a garment on which there is a slide fastener, make sure the fastener is completely closed. Careless pressing and creasing of the slide fastener may eventually throw some of the teeth out of alignment.

Get Longer Service Out of Your Shoes. If you want to double the life of your shoes, rest them between wearings.

Polish improves their good appearance and helps preserve and keep the leather soft.

Heels should be straightened as soon as they begin to wear unevenly. Run-down heels may twist the shoe out of shape and so shorten its life. Watch soles for breaks. Resole only if the uppers justify the expense. Place shoe trees in shoes immediately after wearing.

Shoe racks or bags help keep shoes from being scuffed.

As For Your Bathing Suit: Wash a white or pastel wool or elastic yarn bathing suit in warm, not hot water, with mild soap flakes. Do not use hot water, which shrinks wool more rapidly. Don't rub the suit. Just dose it up and down in the suds. Then rinse in clear water and dry as you would any wool or elastic yarn fabrics, in a position to avoid stretching and away from direct heat.

Rinse a rubber bathing suit after each swim in clear, cold water, then dry it in a towel.

Be sure it's thoroughly dry before you put it away, shake a little talcum inside to prevent it from sticking. Keep it in a cool, dry place. Never hang a rubber bathing suit near heat.

Keep Beauty Creams Fresh. Be sure your jars are always tightly covered—and in a cool place.

Wash Rayon Hose in lukewarm water and mild soap flakes. Be sure to remove your rings; they

for homemakers are made available by The Victory Clinic For The Home.

The Home Front

From time to time the WPB has issued orders stopping the manufacture of things we use every day. Wherever the WPB had to choose between allotting materials for civilian conveniences and war necessities, they chose the war necessities. That's what we all want.

A look at the list of things on which the WPB has stopped production in the past six months makes us realize that war is striking right into our homes. Here are some of them:

Balloons, sewing machines, vacuum cleaners, lawn mowers, domestic oil burners, electric ranges, electrical appliances, domestic washing machines, and irons and outboard motors.

And here's another list of everyday items on which production has been sharply cut down:

Baby carriages, bedding and mattresses, bicycles, cutlery, caskets and burial vaults, domestic ice refrigerators, fountain pens and mechanical pencils, kitchen utensils, and razor blades. Thus we home folks put more material—more plants, more machines and more workers into all-out war production!

FATS AN GREASE

Because driftings to fight the Axis would have thought it.

Bird fats make glycerine and glycerine makes explosives. If American hogs-sausage salvage only one-fourth the kitchen greases ordinarily thrown out, this will provide the power for firing 1,250,000,000 antiaircraft shells at our enemies.

But to get those colossal figures down to Home Front kitchen size, one pound of fat contains enough glycerine to make explosives for four anti-aircraft shells. Take your waste kitchen fats to your butcher in containers holding not less than one pound. Be sure and strain the grease before you turn it in.

From the frying pan to the firing line! That's the slogan.

SUGAR FOR CANNING

It takes sorting and straightening out to get any program running smoothly . . . And it takes time to iron out the wrinkles in sugar rationing. Here's some facts that may be helpful to home canners.

The local rationing boards are instructed to allow sugar for canning fruit on the basis of one pound for every four quarts of finished fruit. They are also instructed to consider each application individually before issuing a sugar purchase certificate.

Here are some factors the boards must consider in deciding how much sugar each applicant is allowed: Size of family, family's requirements, availability of fruit, canning practices of the locality, amount of canned fruit on hand, time during which canning is to be done, number of quarts canned last year. These things are variable.

There are some invariable factors. This sugar must be used only for thin-up canning of fruits and berries. The amount of sugar you are allowed is limited only by the amount of fruit and berries you can; there is no flat allotment for every applicant; no sugar is allowed for canning vegetables; you can go back for more canning sugar as many times as you need; you don't have to have your fruit when you get your sugar; if you feel the amount of sugar you are allowed is insufficient, appeal to your state OPA director.

NEW IDEAS
for Home-makers
By RUTH WYETH SPEARS

GIVE an old wicker chair a smart cover of gay chintz and it will be ready to start a new life. The chintz for this chair has a quaint pattern of strawberries with green leaves and the skirt with its trim box pleated corners is plain green. The cover is removable with a zipper opening down the center back and long

stitches with heavy thread through the cover and the wicker are used here and there to hold it neatly in place.

The padding for the inside of the back lends both style and comfort. The cotton batting is fitted and cut on the chair. It is then used for a pattern to cut a slightly larger muslin foundation and the chintz, as shown at the upper left. These three layers are then basted and stitched together to make the puffed ridges-for this part of the cover. Plain seams are used to stitch the pieces of the cover together.

NOTE: Mrs. Spears' booklet No. 7 gives complete directions for making the ottoman shown in this sketch. Also more than 30 other fascinating homemaking projects, each with working drawings. If you have never made slip covers you will want Book 1, as it shows the beginner exactly how to cut it and sew them. Send your order to:

When Your Back Hurts -

And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable because the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatism, poor blood circulation, getting up at night, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

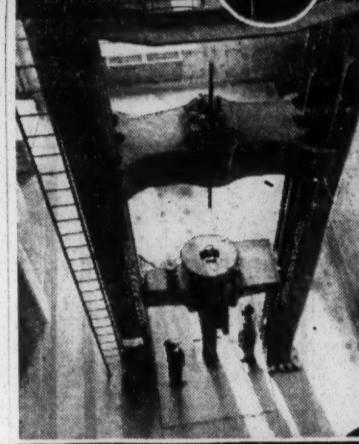

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medical man than on a country doctor's approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.

DOAN'S PILLS

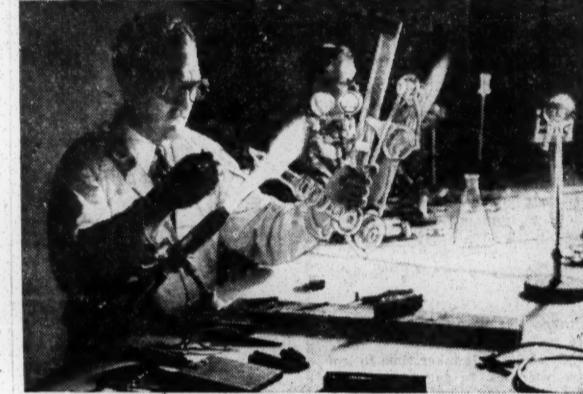

Engineer's Wonderland

A wonderland of modern miracles is housed within the white Lannon stone walls of the Northwestern University's new Technological Institute at Evanston, Ill. There are rooms where it is always raining, and taps which deliver the pressure of 3 Niagara. Right: Physics professor, Brentano (center), and two assistants, analyze the elements in a piece of metal alloy.

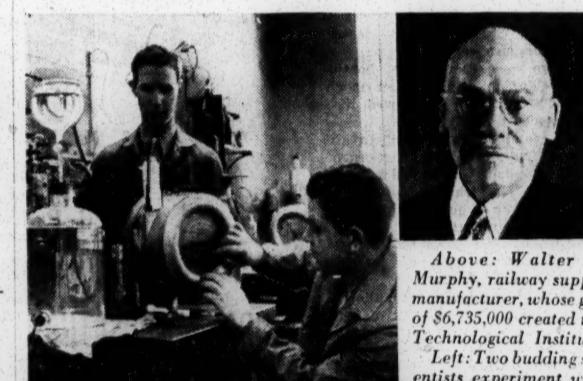

Picture Parade

At the institute there is a machine which exerts the pulverizing weight of 5,000,000 pounds, another that sags with the weight of an eyelash. One room is colder than the North Pole and another three times as hot as the Sahara at midday. Left: Crushing 18-inch thick concrete or gently cracking egg shells is equally easy for this two and a half story 1,000,000-pound testing machine, which is used to study structural performance of large beams.

For modern research in chemistry and physics the ancient art of glass blowing, shown here, is still an essential factor. James F. Morris prepares many intricate and unusual pieces of apparatus in the new Technological Institute.

Above: Walter P. Murphy, railway supply manufacturer, whose gift of \$6,735,000 created the Technological Institute.
Left: Two budding scientists experiment with chemical reactions.

Chemistry Professor Malcolm Dole (right) uses a model to explain to students what a molecule of nylon looks like. The chemistry department works in co-operation with the engineering department.

The Technological Institute of Northwestern University.

Milk Distribution Changes Pending

Labor, Transportation, Material Shortages Reason

By T. G. STITTS
(Chief of Co-Op Research and Service, Farm Credit Administration, Washington, D. C.)

Shortages of critical materials and resources threaten to bring about more dramatic changes in milk distribution methods within the short space of a few weeks than the combined forces of competition and industrial ingenuity have brought about in the past few years.

Shortages of rubber, labor, trucks, machinery, paper and possibly other materials may accentuate the trend away from home delivery, speed up every-other-day delivery, cause zoning of sales areas and may spell the end of special deliveries and particular special services.

These war-time factors overshadow temporarily the longer-run trend toward new methods of distribution which have been going on for several years in the fluid milk industry.

Courtesy U. S. Department of Agriculture

This little miss from Washington, D. C., knows what is good for her. The millions of gallons of milk consumed each week, both here and abroad in those nations to which Uncle Sam has sent it, is preventing malnutrition which so sorely afflicted war time nations during the last war.

try. These longer-run developments, however, retain a basic importance not only during the war but in the post-war period.

Paper Instead of Metal
The introduction of paper containers, growth of gallon and half-gallon containers, increase in store sales, increased sale of special milks, growth of peddlars, use of retail price-quantity discount schemes and development of all wholesale dealers are among the more important recent changes that were well under way in several larger cities before the defense and the war emergency developed.

From experiences so far, it is difficult to conclude how many of these changes will be permanent. Many of them will be, but others may prove to be unsatisfactory for one reason or another.

AGRICULTURE INDUSTRY

Cotton

By FLORENCE WEED

(This is one of a series of articles showing how farm products are finding an important market in industry.)

Cotton seed will soon be more important than cotton lint, according to a cotton economist. This change has come about since science has discovered new uses for linters, hulls, oil and meal.

Linters are the short fuzzy fibers left by the gin. They are used for gun cotton varnishes, mattresses, fine writing paper, kodak films, smokeless powder and shatter-proof glass. Mixed with chemicals, the linters form plastics that can be molded into thousands of useful articles from radio cases to knife handles. Linters, spun into yarn, make the new rayon fabrics.

Cotton hulls go into bran for cattle, blotting paper, packing materials, baseballs and horse collars. Oil pressed from the seed is sold for food uses and goes into auto cup grease, roofing tar, cosmetics and in emulsifying medicine. Cotton cake and meal, left after the oil is extracted, is used for stock feed and fertilizer.

Cotton cloth has been used experimentally in making hard surfaced highways in 25 states.

Research has produced a cotton cloth that looks like wool and is being used for blankets. A new cordage, strong enough for parachute harness and bomb slings, is taking the place of linen, once imported before the war.

Rural Briefs

For best production milking should be done at regular hours. After milking is started, it should be completed without interruption and as rapidly as possible.

A new method of cheese-making developed at the Virginia Polytechnic Institute cuts the customary time in half and has been selling at a premium on the market.

PATTERNS SEWING CIRCLE

WHAT a practical idea there is in this cunning small outfit for little girls! Off with the jacket and you have a cunning play dress without sleeves—so it permits rolling freedom and plenty of healthy sun tan. It is a dress which your daughter can wear in comfort for hours of back-yard play, beach games and farm life!

The jacket which dramatically transforms the princess frock into a smart street outfit is just waist length, has tiny short sleeves and a simple square neck. You'll like the effect if you apply to the skirt two bands of the material you use in the jacket. Band the panties, too, to complete the cheerful ensemble. Pattern No. 1607-B gives you complete instructions for making each of the three pieces.

Barbara Bell Pattern No. 1606-B is designed for sizes 11, 13, 15, 17, and 19. Corresponding bust measurements are 30, 32, 35 and 37. Size 13 (31) with shoulder ruffles requires 3½ yards 35-inch material. With short sleeves, 3½ yards.

J. Fuller Pep

By JERRY LINK

Nothing much gets by Old Judge Wiggins! "Fuller," he says to me, "just about the only things that can keep on growing without nourishment is some folks' constitutions!"

And spakin' o' nourishment reminds me that you got to get all your vitamins. That's why I keep tellin' folks about KELLOGG'S PEP. 'Course PEP hasn't all the vitamins. But it's extra-rich in the two most likely to be short in ordinary meals—vitamins B₁ and D. And PEP's a jin-dandy tastin' cereal, too. Why not try it tomorrow?

Kellogg's Pep

A delicious cereal that supplies per serving (1 oz.) the full minimum daily need of vitamin D; 1/4 the daily need of vitamin B₁.

Happy People
That is the best government which desires to make the people happy and knows how to make them happy.—Macaulay.

YOUR GOOD WILL

The manufacturer or merchant who advertises, makes public the fact that he wants your good will. And he realizes that the only way that he can keep it is by giving good values and services.

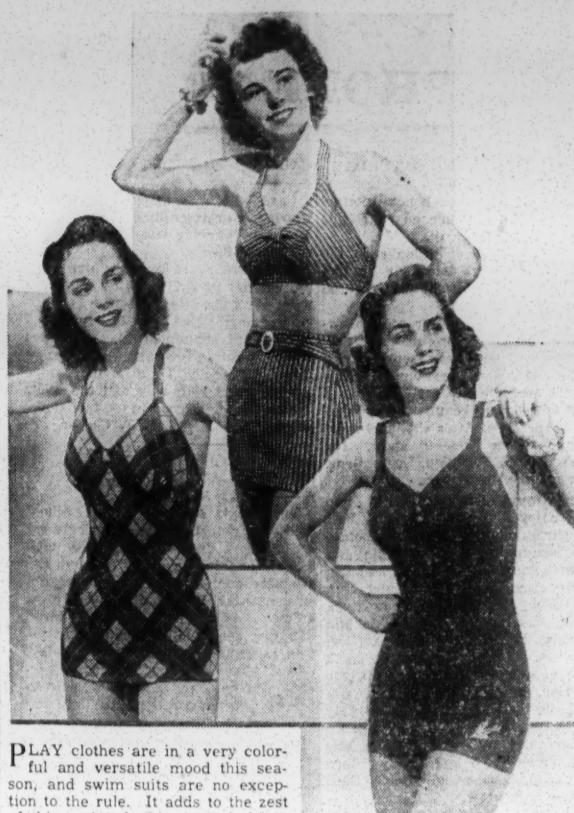

Faithful in Small Things

Duty, be it in a small matter or a great, is duty still, the command of Heaven, the eldest voice of God; and it is only they who are faithful in a few things who will be faithful over many things. Only they who do their duty in everyday matters will fulfill them on great occasions.

Charles Kingsley.

Fitted Suits Are Favored by Those Who Really Want to Swim

By CHERIE NICHOLAS

PLAY clothes are in a very colorful and versatile mood this season, and swim suits are no exception to the rule. It adds to the zest of things that bathing suit fashions present two distinct trends to be considered, for dressmaker fabric types vie with body-molding wool knits.

With some of the selecting of swim suits is a matter of picturesque garb which spends more hours on the beach in the style parade than in the water. To these the dressmaker styles which play up novelty and fabric dramatically make definite appeal.

Then there are the real swimmers who go in for health and exercise and empires of this earth have seen them "rise and wane," and even unbelievers are beginning to talk about the necessity of a spiritual anchorage for the souls of men. It is found only in Christ, but in Him is found both peace and power for victorious living.

But we see a second gift of God—

II. Protection (vv. 5-7).

Human life is not as cheap as men would have us think. Their estimate based on greed and lust for power makes man but a unit in a machine designed to build up political power. The blood of those who are not profitable to such an enterprise, is shed in utter callousness.

Those who do such things, need to read the words of God, "Whoso sheddeth man's blood, by man shall his blood be shed: for in the image of God made he man" (v. 6). What a tremendous bill some men will have to pay when they stand before the seat of judgment of our God. Even the animals who kill men are to be slain (v. 5). How much greater shall be the condemnation of the man who violates God's command.

But we see a third gift of God, designed to remove a deep fear from his heart, namely God's—

III. Promise (vv. 8-16).

God made a covenant with Noah and with his descendants and every living creature (vv. 9, 10). This is the third of God's eight covenants with man, beginning with the one to Adam in the Garden of Eden (Gen. 1:28), and closing with the new covenant (Heb. 8:8).

This was a promise of God's grace that there should be no more judgment by flood, and as a sign He chose the rainbow, which, appearing in the very time when rain should fall, would reassure men that a new flood was not coming upon them. What a beautiful symbol!

"I will remember," said God, and He has not forgotten. Though thousands of years have passed, there has never since been such a cataclysm of judgment. How unspeakably precious it is to recall that God has not forgotten a single one of us; that He remembers every promise He has ever made; that He keeps every covenant. And on the contrary, how disturbing it must be to the unbeliever to realize that God has not forgotten his sin and unbelief, nor the judgment which is sure to come.

The story of Noah should stimulate our faith, causing us to trust God, to obey His every command, and to look to Him for His power in our lives. His protection over us, His promise of grace to all who believe.

Faithful in Small Things

Duty, be it in a small matter or a great, is duty still, the command of Heaven, the eldest voice of God; and it is only they who are faithful in a few things who will be faithful over many things. Only they who do their duty in everyday matters will fulfill them on great occasions.

Charles Kingsley.

Wine and gray gingham makes this jacket dress for town wear.

There are interesting details that give this stunning outfit distinction. The beautifully cut jacket has bias bands of the gingham on pockets and cuffs. The bias idea is carried out, also, in the pleated skirt and the jabot. A very significant detail is this jabot, for it is an innovation for it to be of self fabric. This technique has been used successfully by a leading designer for lightweight cloth suits.

Two-Piece Ensemble Has Wide Scarf for a Jacket

When the fall season gets in swing one of the sights you'll see that's good for the eyes is the tweed two-piece ensemble that college girls will adore.

It has a tweed skirt finished off with self fringe (the edge raveled) up and down the wraparound edge to the left. Instead of a jacket there's a wide, shawl-like scarf. The shawl also has matching self-fringed edges. Add a bright blouse to bring the costume to a perfect climax.

Fly Is Paralysis Carrier

Discovery that common flies carry the virus of infantile paralysis has been made by Drs. John L. Paul and James D. Trask at Yale university medical school.

It is now evident that poliomyelitis (infantile paralysis), which cripples 10,000 persons and kills from 500 to 1,000 every year, is a disease of the intestinal tract as well as the spinal cord, and that flies may carry the virus from sewage.

The discovery of Drs. Paul and Trask makes the common house fly more than ever an enemy to health and even to life itself, especially among children.

Admirals may be admirable, but that isn't where the word comes from. It comes from an old Arabic word "amir-al," meaning "commander of." That's what the Admiral is, the top-ranking officer in the Navy. Top-ranking cigarette with our Navy men is Camel—the favorite, too, with men in the Army, Marines and Coast Guard, according to actual sales records from their service stores. Camels are their favorite gift, too. Local dealers are featuring Camel cartons to send anywhere to any member of our armed forces. Today is a good time to send "him" a carton of Camels.—Adv.

Young Suitor Felt Sure The Idea Was Correct

The young man had for some months been calling on Helen. Then at last he came to see her father. Without a tremor he asked for the daughter's hand in marriage, and hardly waiting for a reply, added this announcement: "It's mere formality, I know. But we thought it would be pleasing to you if it were observed in the usual way."

Helen's father stiffened and glowered, then:

"And may I inquire," he asked, "who suggested to you that asking my consent to my daughter's marriage was a mere formality?"

"Yes," replied the young man. "It was Helen's mother."

Acid Indigestion

What many Doctors do for it:
When excess stomach acid causes gas and discomfort, doctors prescribe the fastest acting medicine—Black Leaf 40. It gives relief in seconds. It's the best laxative. No laxative in your home can help like Black Leaf 40.

**HIT THAT RHEUMATIC PAIN
RIGHT WHERE IT HURTS**
And look at the Silver Lining
in those Clouds of Pain

The big idea is that you want to feel better. When pain comes, your mind eases. You get rest that means deliverance. So for something that gets at the pain, Clegg's brings you Kool-Aid to help. Now you will feel as good as others who believed its help. Don't put it off. Get Clegg's now for Silver Linings where it's only as directed. Purchase price refunded if you are not satisfied.

Double-Purpose Laxative Gives More Satisfaction

Don't be satisfied just to relieve your present uncomfortable condition. Meet the problem more thoroughly by turning up your nutritional condition. Try this Black Leaf 40. It's the best laxative. An All Purpose Laxative Powder—an intestinal relief laxative. It not only acts gently and thoroughly, but tones lax bowel muscles—giving more satisfaction. Dr. Hitchcock's Laxative Powder relieves Dizzy Spells, Sour Stomach, Gas, Headache, and that dull sluggish feeling commonly referred to as Boredom, which caused by Constipation. Use only as directed. 15 doses for only 10¢. Large family size 25¢. Adv.
